At 60+ hours, this Python course is without a doubt the **most comprehensive** Python course available anywhere online. Even if you have **zero** programming experience, this course will take you from **beginner to professional**. Here's why:

- The course is taught by the **lead instructor** at the App Brewery, London's **best in-person programming Bootcamp**.
- The course has been updated and you'll be learning the latest tools and technologies used at large companies such as Apple, Google and Netflix.
- This course doesn't cut any corners, there are beautiful **animated explanation videos** and tens of **real-world projects** which you will get to build. e.g. Tinder auto swiper, Snake game, Blog Website, LinkedIn Auto Submit Job Application
- The curriculum was developed over a period of **2 years**, with comprehensive student testing and feedback.
- We've taught over 600,000 students how to code and many have gone on to **change their lives** by becoming professional developers or starting their own tech startup.
- You'll save yourself **over $12,000** by enrolling, and still get access to the same teaching materials and learn from the same instructor and curriculum as our in-person programming Bootcamp.
- The course is **constantly updated** with new content, with new projects and modules determined by students - that's you!

We'll take you **step-by-step** through engaging video tutorials and teach you everything you

- Request
- WTForms
- Data Science
- Pandas
- **NumPy**
- Matplotlib
- **Plotly**
- Scikit learn
- Seaborn
- Turtle
- Python GUI Desktop App Development
- **Tkinter**
- Front-End Web Development
- HTML 5
- CSS 3
- Bootstrap 4
- Bash Command Line
- Git, **GitHub** and Version Control
- Backend Web Development
- **Flask**

including:

- Blackjack
- Snake Game
- Pong Game
- Auto Swipe on Tinder
- Auto Job Applications on LinkedIn
- Automate Birthday Emails/SMS
- Fully Fledged Blog Website
- Build Your Own Public API
- Data Science with Google Trends
- Analysing Lego Datasets
- Google App Store Analysis
- and much much more!

Sign up today, and look forward to:

- Video Lectures
- Code Challenges and Exercises
- Fully Fledged Projects
- Quizzes
- Programming Resources and Cheatsheets

coding!" - Yiqing Zheng

"So far (on my third day) this course has taught me **more than I was able to learn in multiple other programming courses**. This course is clearly outlined and builds upon itself gradually in an easy to understand way." - Normal Ramsey

"It's a different approach to teaching Web Development. I like that you are **given everything possible to succeed** from the onset." - Ronick Thomas

The tutor is simply AMAZING, by far the best tutor I have ever had. I would give her 10 stars out of 5. She is not just punching the code and talking to herself, but she is actually explaining things. She keeps on giving really useful hints and she will give you a great load of other references. I always knew what I was doing and why I was doing it. All the extra challenges have just made me remember and understand things better. - Peter Dlugos

REMEMBER… I'm so confident that you'll love this course that we're offering a FULL money-back guarantee for 30 days! So it's a complete no-brainer, sign up today with ZERO risk and EVERYTHING to gain.

So what are you waiting for? Click the buy now button and join the world's highest-rated development course.

Angela is a great teacher and I have taken some other courses of hers. This one seems to be of the same great quality. If you want a simple code-along, this is not for you. Angela will Challenge you to actually use what she teaches you many times along the way. You WILL know how to program Python when you finish this course!

I'm Angela, I'm a developer with a passion for teaching. I'm the **lead instructor** at the London App Brewery, London's leading **Programming Bootcamp**. I've helped hundreds of thousands of students learn to code and change their lives by becoming a developer. I've been invited by companies such as Twitter, Facebook and Google to teach their employees.

My first foray into programming was when I was just 12 years old, wanting to build my own Space Invader game. Since then, I've made **hundred of websites, apps and games**. But most importantly, I realised that my **greatest passion** is teaching.

I spend most of my time researching how to make **learning to code fun** and make **hard**
